V P ANAGH UTHAMAN

Linux Systems Administrator & Cloud / DevOps Engineer

Email: kakarotthebeast1@gmail.com | GitHub: github.com/an9gh | LinkedIn: linkedin.com/in/anaghvp

CERTIFICATIONS & MISSIONS

- Red Hat Certified System Administrator (RHCSA) - Active RHEL 10 / EX200 Focus
- Red Hat Certified Engineer (RHCE) Track - Ansible Infrastructure Automation
- AWS Cloud Architecture (VPC, EC2, IAM, S3, RDS, Security Groups)

TECHNICAL SKILLS

- Linux: RHEL 8/9/10, systemd, Storage/LVM, SELinux, firewalld, Bash Scripting
- DevOps & Cloud: AWS, Ansible, Podman, Docker, Git, CI/CD Pipelines, Reverse Tunnels

HANDS-ON PROJECTS

1. Ansible Infrastructure Automation Lab (github.com/an9gh/ansible-works)
   3-node KVM lab with 1 Control & 2 Managed nodes. Passwordless SSH, sudoers, automation playbooks.
2. RHEL Emergency Root Password Recovery (github.com/an9gh/rhel-root-password-recovery)
   Emergency root access recovery via GRUB rd.break, sysroot remounting, and SELinux relabeling.
3. Linux Administration & Shell Practice (github.com/an9gh/bash-practice)
   Production-oriented Bash scripts for auditing, system metrics collection, and backup automation.
4. Android ARM64 Edge Micro-Server
   Self-hosted edge server running Python telemetry and encrypted reverse tunnel over Cloudflare.
